

Choose a capture region

Keep the slide inside the selected area.

- 1 Open these sample slides in a browser.
- 2 Use LessonCap to select the slide rectangle.
- 3 Start capture before moving to the next page.

Capture a page change

A large content change makes the exercise easy to inspect.

- 1 Advance to this slide after capture starts.
- 2 Wait several seconds before changing pages again.
- 3 Observe whether the captured-slide count increases.

Stop and export

Review the result before relying on it for a real lecture.

- 1 Stop capture in LessonCap.
- 2 Export the captured pages as a PDF.
- 3 Check page order, boundaries, duplicates and readability.
